Full Stack Engineer — React.js · TanStack Start · Express.js · Cypress

github.com/gost1930 · LinkedIn: Hadbi Mohamed

PROFESSIONAL SUMMARY

Results-driven full-stack engineer with a proven track record of delivering end-to-end features across modern JavaScript ecosystems (React.js, Node.js, Express.js). Skilled at optimising database queries, structuring clean and maintainable code architecture, and translating client requirements into scalable, production-ready applications. Committed to application stability and quality through automated end-to-end testing with Cypress, ensuring reliable releases across freelance and contract engagements.

WORK EXPERIENCE

- iso voyage**

Algiers, Algeria

Apr 2025 — Present
- Full Stack Engineer (Contract / Hybrid)**

Jun 2026 — Present
- Architected and developed a full-stack agency web portal and core admin dashboard using React.js and Node.js/Express.js to streamline business operations.
 - Built a dedicated support dashboard and backend infrastructure to handle customer support workflows, ticketing and administrative actions.
 - Managed deployment workflows and server environments on Linux-based VPS infrastructure.
- Full Stack Engineer (Freelance / Remote)**

Jan 2026 — Jun 2026
- Expanded scope to full-stack ownership, engineering scalable backend API endpoints and integrating them with React frontends.
 - Authored automated end-to-end test suites with Cypress to validate critical user flows and enhance application stability.
- Frontend Developer (Part-time / Remote)**

Apr 2025 — Jan 2026
- Engineered responsive, high-performance user interfaces using React.js and Tailwind CSS.
 - Collaborated with the core team to translate design requirements into modular, reusable UI components.
- MARS POS**

Saudi Arabia (Remote)

Sep 2024 — Dec 2025
- Full-Stack Developer (Freelance)**

Oct 2025 — Dec 2025
- Designed and implemented Express.js/Node.js backend features for core point-of-sale workflows and transaction handling.
 - Optimised API response times and database queries, reducing latency under real-time POS transaction loads.
- Frontend Web Developer (Freelance)**

Sep 2024 — Jan 2025
- Built custom, interactive menu filter grids and dynamic POS interface elements to streamline order entry efficiency.

TECHNICAL SKILLS

Frontend & Frameworks:

React.js, TanStack Start, JavaScript (ES6+), TypeScript, Tailwind CSS, HTML5/CSS3

Testing & Quality Assurance:

Cypress (end-to-end testing)

Backend & Architecture:

Node.js, Express.js, RESTful APIs, JWT authentication, Clean architecture

Databases & Tools:

MySQL, MongoDB, Git & GitHub, Postman, Linux / VPS deployment

FEATURED PROJECTS

Agency Web Portal & Admin Dashboard

Full-stack portal, admin dashboard and support console built with React.js, Node.js/Express.js and Tailwind CSS, with JWT-based role-aware authorisation and Linux VPS deployment.

MARS POS — Point-of-Sale Platform

Interactive menu filter grids and dynamic POS interface elements, plus Express.js backend features for transaction handling tuned for real-time load.

E-Commerce Client Platform

Full-featured, responsive platform built with React.js, Node.js, Express.js and Tailwind CSS, featuring dynamic product catalogs and real-time cart management.

Restaurant Web Ordering Application (Maylou)

Localised ordering platform built with React.js, Express.js and Tailwind CSS, featuring interactive menu navigation, custom item filtering and a live staff dashboard.

Municipal Projects & Contracting Platform

Server-rendered full-stack application enabling municipal authorities to publish tenders, manage contractor bidding workflows and enforce role-based authorisation.

EDUCATION

Software Engineering & Continuous Learning

Ongoing

Self-directed

Practice-led: every framework and tool listed here was learned by shipping production work with it.

Economics Studies

2021 — 2023

University

Studied economics before moving fully into software engineering.
